Buffalo Mountain Metro District

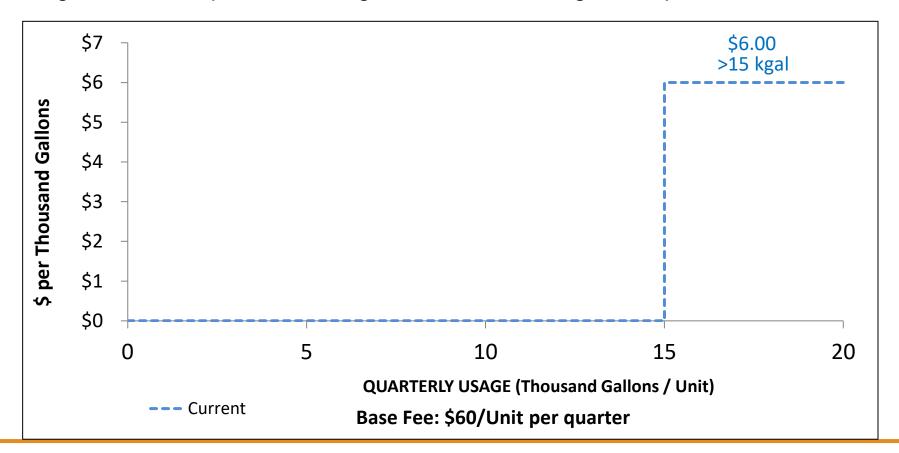

BMMD Rate Study

Kristen Brandecker, El Engineer 1

Current Billing Basis - Water

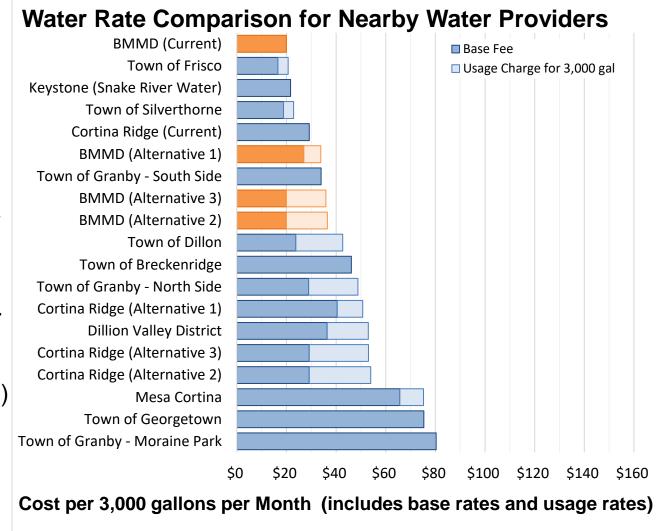

- All customers are charged a flat quarterly base fee plus a usage fee for any water use beyond 15,000 gallons.
- Base Fee: \$60 per quarter
- Usage Fee: \$6.00 per thousand gallons over 15,000 gallons/quarter

Current Billing Basis - Water

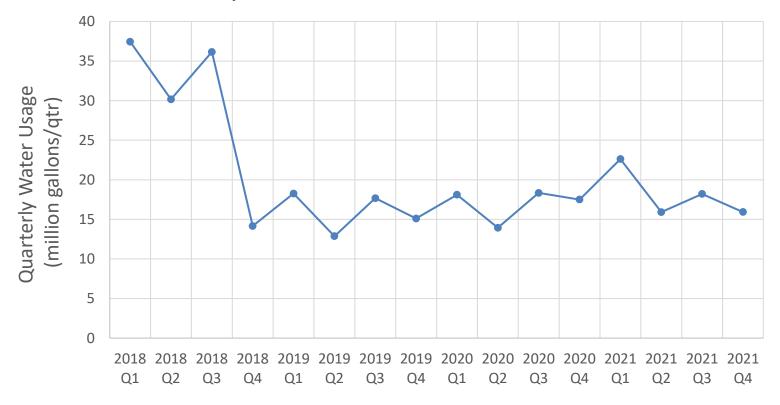

- SGM analyzed 2018, 2019, and 2020 quarterly billing data (provided by District staff) for water service
- All customers are charged a flat quarterly base fee plus a usage fee for any water use beyond 15,000 gallons.
- Base Fee: \$60 per quarter (\$20 per month)
- Usage Fee: \$6.00 per thousand gallons over 15,000 gallons/quarter

Water Usage Trends

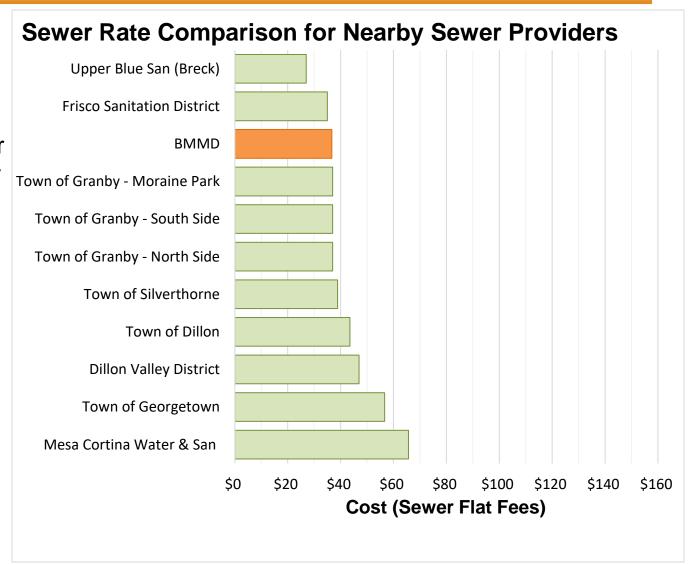

- Water usage for the District is low compared to other water providers
- Low lawn/landscaping water usage, mainly indoor usage
- Usage decreased after 2018 due to a new leak detection system
- Water usage increases slightly in winter (Q1) and summer (Q3)
- Rate increases will likely not decrease water use

Current Billing Basis - Wastewater

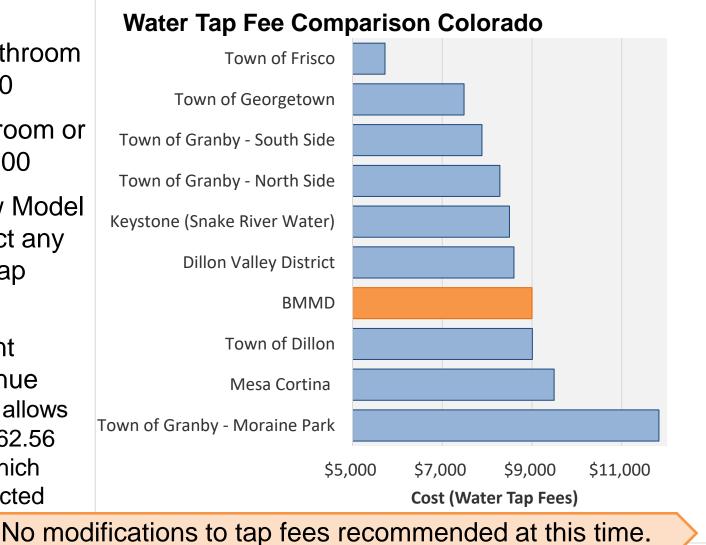

- All customers are charged a flat quarterly base fee
- Base Fee: \$110 per quarter (\$36.67 per month)

Tap Fee Comparison-Water

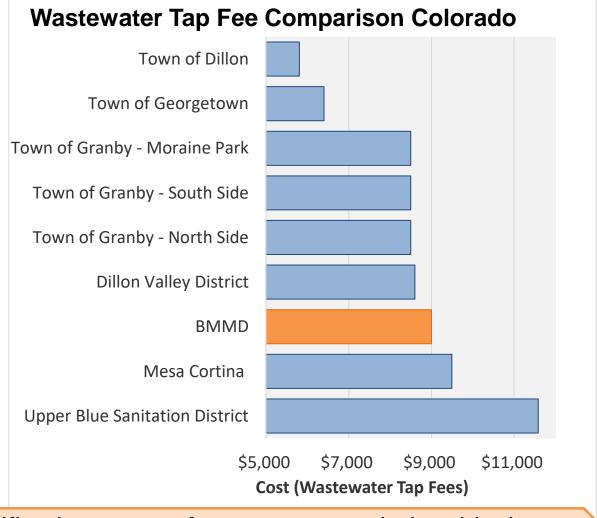

- Tap fee for a 3 bedroom, 3-bathroom house is \$9,000
- Additional bedroom or bathroom is \$900
- The Cash Flow Model does not project any revenue from tap fees.
- Not a significant source of revenue (JSA's EQR cap allows development of 62.56 new EQRs, of which 9.56 are unrestricted EQRs).

Tap Fee Comparison- Wastewater

- Tap fee for a 3 bedroom, 3-bathroom house is \$9,000
- Additional bedroom or bathroom is \$900
- The Cash Flow Model does not project any revenue from tap fees.
- Not a significant source of revenue (JSA's EQR cap allows development of 62.56 new EQRs, of which 9.56 are unrestricted EQRs).

Revenue and Expenses for 2021

| | Revenues 2021 General Water Sewer | | | | | |
|------------------------------|-----------------------------------|-----------|-------------|--|--|--|
| Category | | | | | | |
| Service Fees | - | \$576,270 | \$982,866 | | | |
| Tap Fees* | - | \$20,220 | \$21,380 | | | |
| Mesa Cortina Service Charges | - | \$51,357 | \$21,932 | | | |
| Other | \$26,673 | - | - | | | |
| Total | \$26,673 | \$647,847 | \$1,026,178 | | | |

| | Expenses 2021 | | | | |
|--------------|-------------------|-------------|-----------|--|--|
| Category | General Water Ser | | | | |
| Capital | - | \$532,369 | \$78,095 | | |
| Debt Service | - | \$182,734 | - | | |
| O&M | - | \$438,855 | \$709,563 | | |
| Other | \$201,170 | - | - | | |
| Total | \$201,170 | \$1,153,958 | \$787,658 | | |

Non-operating revenues are split 50/50 between water and sewer

Assumptions: •

- General expenses are split 50/50 between water and sewer
- *No tap fee revenue is projected in future years to be conservative

Wastewater Capital Improvement Plan (CIP)

| Year | Estimated Total Cost in 2022 Dollars |
|-------|--------------------------------------|
| 2022 | \$69,000 |
| 2023 | \$140,000 |
| 2024 | \$150,000 |
| 2025 | \$110,000 |
| 2026 | \$130,000 |
| 2027 | \$130,000 |
| 2028 | \$200,000 |
| 2029 | \$50,000 |
| 2031 | \$25,000 |
| 2032 | \$30,000 |
| 2042 | \$30,000 |
| Total | \$1,064,000 |

Key Takeaway: The complete wastewater CIP list will be included in the report.

Water CIP

| Year | Estimated Total Cost in 2022 Dollars |
|------|--------------------------------------|
| 2022 | \$637,500 |
| 2023 | \$255,000 |
| 2024 | \$1,550,000 |
| 2025 | \$1,095,000 |
| 2026 | \$730,000 |
| 2027 | \$860,000 |
| 2028 | \$238,600 |
| 2029 | \$280,000 |
| 2030 | \$380,000 |
| 2031 | \$40,000 |
| 2032 | \$85,000 |
| 2033 | \$395,000 |

Water CIP Cont.

| Year | Estimated Total Cost in 2022 Dollars |
|-------|--------------------------------------|
| 2034 | \$30,000 |
| 2035 | \$205,000 |
| 2036 | \$390,300 |
| 2037 | \$140,000 |
| 2038 | \$3,045,000 |
| 2039 | \$280,000 |
| 2040 | \$315,000 |
| 2041 | \$290,000 |
| 2042 | \$702,700 |
| 2043 | \$45,000 |
| 2044 | \$180,000 |
| Total | \$12,169,100 |

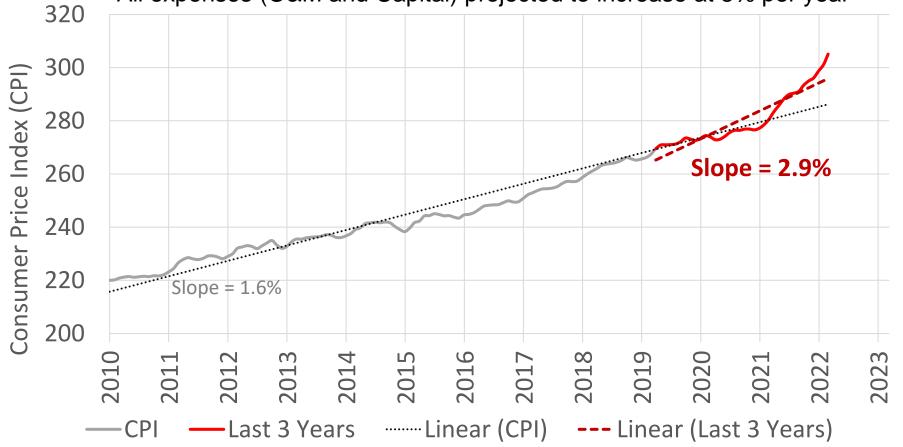

Key Takeaway: The complete water CIP list will be included in the report.

Inflation Assumptions

 The cash flow model assumes an inflation rate of 3% based on historical consumer price index (CPI) increases and Federal Reserve Board's target inflation increases of 2.5-3%

All expenses (O&M and Capital) projected to increase at 3% per year

Reserve Account Balance

- Operations & Maintenance (O&M) Reserve: 6 months O&M expenses
- Emergency & Loan Reserve: Part of the cost to replace Tank 2b or a pump station

| Total Utility Fund | Total Utility Fund | Description |
|-----------------------------|--------------------|--|
| O&M Reserve | \$ 674,794 | 6 months O&M Expenses |
| Emergency & Loan Reserve | \$ 1,000,000 | Chosen by District Staff, to cover half a tank replacement or a pump station replacement |
| Total | \$ 1,674,794 | O&M Reserve + Emergency Reserve |
| Planned Inflation Rate | 3% | Federal Reserve Board's target inflation increases of 2.5-3% |

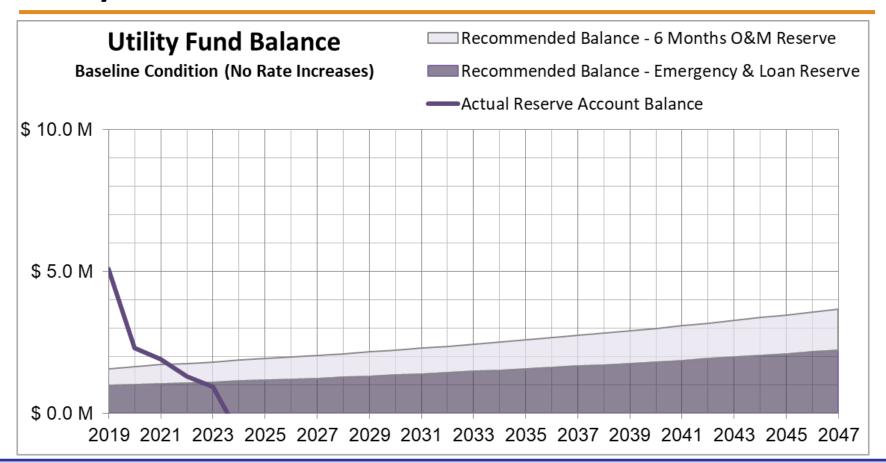

Rate Revenue Alternatives

SGM developed multiple rate revenue alternatives to show options for how the District can raise rates to meet its goals of:

- Meeting expected operations and maintenance costs
- Funding the District's Capital Improvements Plan to replace aging infrastructure and make necessary upgrades
- Keeping a reserve balance to maintain operational flexibility

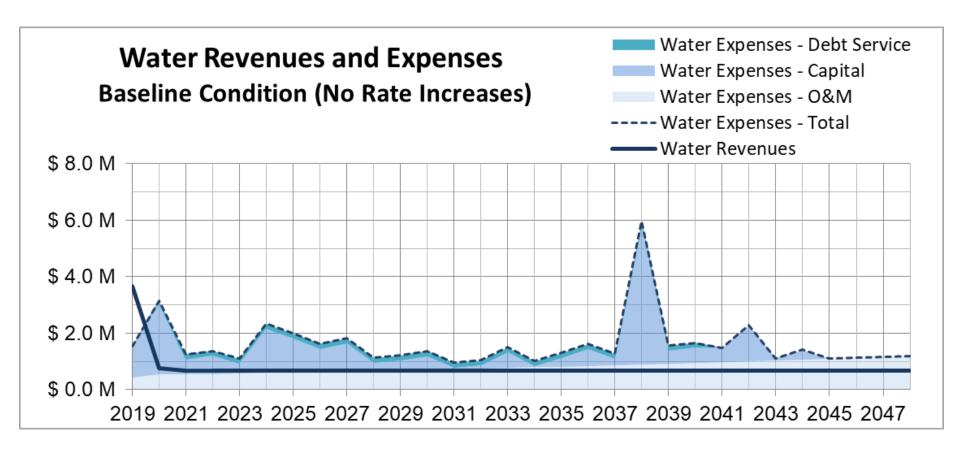

Utility Fund Balance: No Rate Increases

Key Takeaway: Water and sewer rate increases are needed to cover operations & maintenance (O&M) expenses, cover planned capital projects, and keep the reserve account balance.

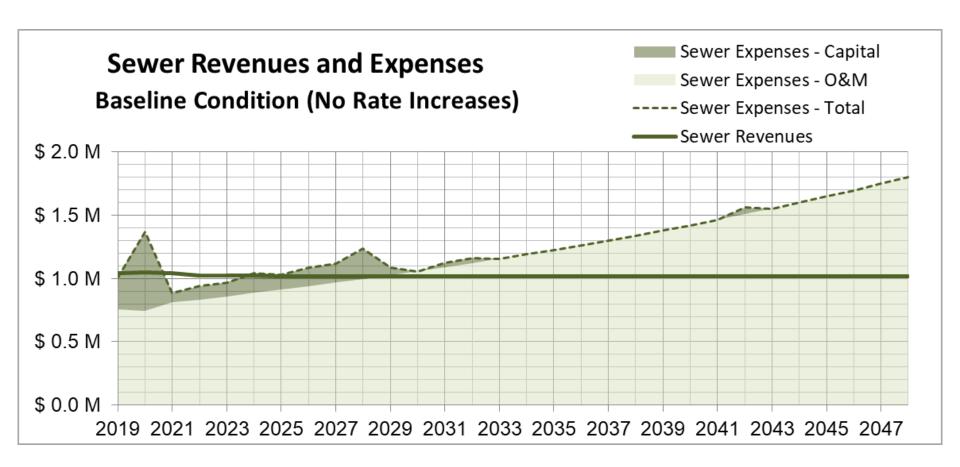

Water Revenue and Expenses: No Rate Increases

Key Takeaway: Rate increases will be needed to cover expenses

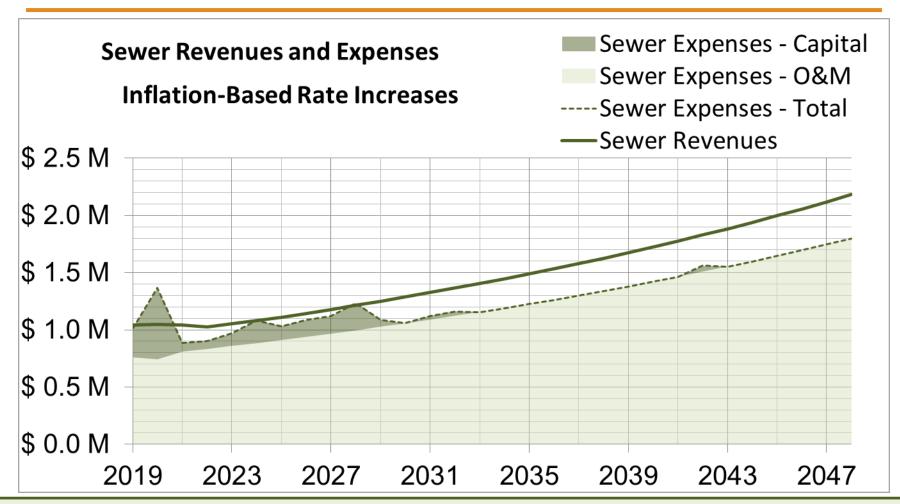

Sewer Revenue and Expenses: No Rate Increases

Key Takeaway: Rate increases will be needed to cover expenses

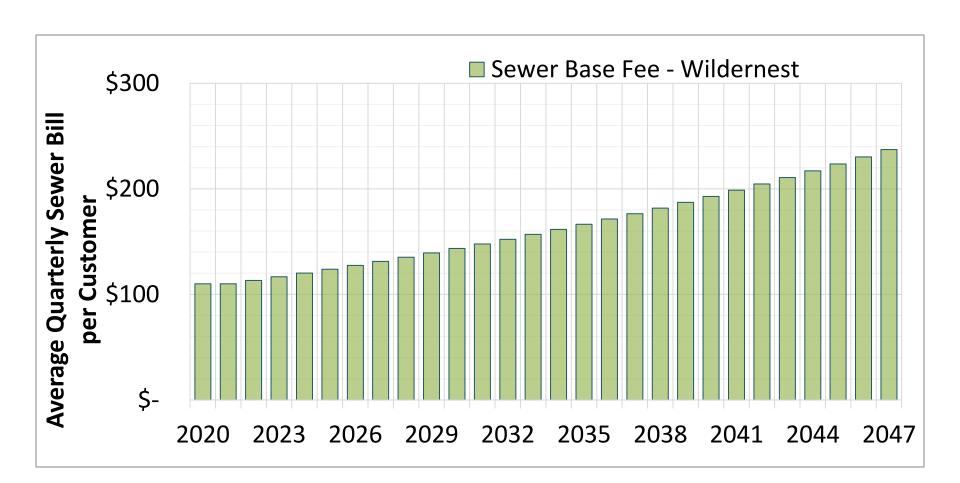

Sewer Revenue & Expenses: Inflation Based Rate Increases

Recommendation: Structure all rate increase alternatives to include inflation-based rate increases for sewer fees

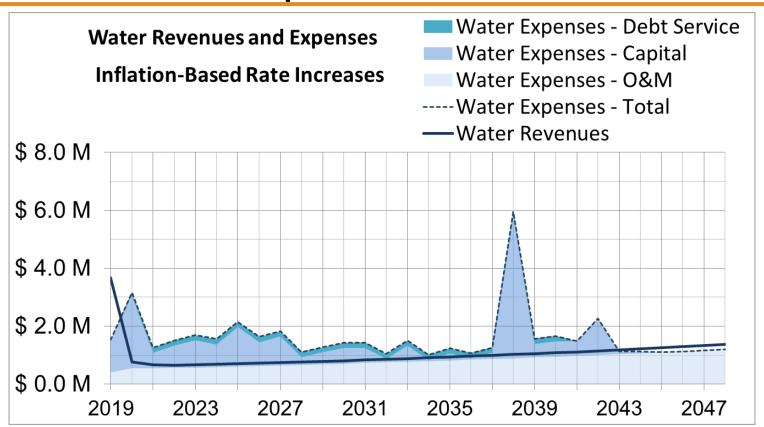

Average Quarterly Sewer Bill: Inflation Based Rate Increases

Water Revenue & Expenses: Inflation Based Rate Increases

Key Takeaway: Inflation-based water rate increases are

- sufficient to cover operations & maintenance (O&M) expenses
- insufficient to cover planned capital projects

Proposed Water Rate Increase Alternatives

- Three rate increase alternatives were evaluated using the cash flow model
- All alternatives have the same loan assumptions
- Each alternative has different a rate structure

| | Alternative 1 | Alternative 2 | Alternative 3 |
|-----------|-----------------------------------|-----------------------------------|-------------------------------------|
| Loon | 2024 loan | 2024 loan | • 2024 loan |
| Loan | 2038 loan | 2038 loan | 2038 loan |
| | Change | Keep Current | Keep Current |
| Rate | Base Rate | Base Rate | Base Rate |
| Structure | Two-Tier Rate | Two-Tier Rate | Three-Tier Rate |
| | Structure | Structure | Structure |

Loan Assumptions

Loan Assumptions for all Alternatives:

| | 2024 Loan | 2038 Loan |
|------------------------|----------------------|--------------------|
| Loan Amount | \$ 6 Million | \$ 5 Million |
| Projects Covered | "Bundled" short-term | Tank 3 replacement |
| Projects Covered | CIP projects | & associated items |
| Dayback Daried | 20-year | 20-year |
| Payback Period | 2024 – 2044 | 2038 – 2058 |
| Assumed Rate | 3% | 3% |
| Approx. Annual Payment | \$403,000 | \$336,000 |

- The District will pursue a state revolving fund (SRF) loan
 - 3% is a conservative estimate for the finance rate
- The 2024 leveraged loan will cover certain water CIP projects from 2024-2035.
 - These projects will be prioritized and completed within 3-5 years after the loan is received. Recommend detailed reevaluation of CIP timeline during SRF funding process.
 - The District will need to complete the eligibility survey during the June 1, 2023 to June 30, 2023 application period.

Considerations for Tiered Water Rates

| • | Increasing block tiers are well suited to |
|---|---|
| | small utilities with a homogenous |
| | customer base, such as BMMD (primarily |
| | residential customers) |

Advantages

Conservation:

- Increasing block rate structures encourage conservation
- Billing for every drop of treated water consumed (including Tier 1) reinforces the message that water is a valuable resource and that none of it is free
- Customers are rewarded for indoor conservation

Revenue stability:

 Tier 1 and base rate will generate stable revenue and will help reliably cover fixed costs of service

Increased complexity:

 Tiered rate structures are more complex for utilities from a billing perspective (additional billing and customer service considerations)

Disadvantages

 The rate structure can be difficult to communicate to customers

Revenue volatility for outdoor use

 Increasing block rates can increase revenue volatility in utilities with high outdoor use; however, BMMD has low outdoor use and a base fee

Equity

 Increasing block rate structures can create inequity, especially for commercial or industrial users

Water Revenue Statistics

| Water Revenue Statistics | | | | | | | |
|--------------------------|-------------------------------|---------|---------|--------|--------------|--|--|
| | Tier #> | | 1 | 0 | Base Fee | | |
| Cylisting Date | Tier Bottom (kgal/.qtr-unit)> | | > 15 | 0 - 15 | (\$/qtrunit) | | |
| Existing Rate Structure | Rates (\$/Unit-kgal) | | \$6.00 | \$0.00 | \$60.00 | | |
| Structure | Volume (%) | | 11.4% | 88.6% | | | |
| | Revenue (%) | | 7.7% | 0.0% | 92.3% | | |
| | Tier #> | | 2 | 1 | Base Fee | | |
| Alt 1 - Change Base | Tier Bottom (kgal/.qtr-unit)> | | > 15 | 0 - 15 | (\$/qtrunit) | | |
| Rate + Two Tier | Rates (\$/Unit-kgal) | | \$12.00 | \$2.27 | \$81.00 | | |
| Rate Structure | Volume (%) | | 11.4% | 88.6% | | | |
| | Revenue (%) | | 9.3% | 13.7% | 77.0% | | |
| | Tier #> | | 2 | 1 | Base Fee | | |
| Alt 2 - Current Base | Tier Bottom (kgal/.qtr-unit)> | | > 15 | 0 - 15 | (\$/qtrunit) | | |
| Rate + Two Tier | Rates (\$/Unit-kgal) | | \$12.00 | \$5.49 | \$60.00 | | |
| Rate Structure | Volume (%) | | 11.4% | 88.6% | | | |
| | Revenue (%) | | 9.3% | 33.2% | 57.4% | | |
| | Tier #> | 3 | 2 | 1 | Base Fee | | |
| Alt 3 - Current Base | Tier Bottom (kgal/.qtr-unit)> | > 11 | 7 - 11 | 0 - 7 | (\$/qtrunit) | | |
| Rate + Three Tier | Rates (\$/Unit-kgal) | \$12.00 | \$11.58 | \$3.48 | \$60.00 | | |
| Rate Structure | Volume (%) | 15.8% | 19.4% | 64.8% | | | |
| | Revenue (%) | 13.4% | 15.8% | 15.9% | 54.9% | | |

Water Rate Structures Analyzed

The cash flow model evaluated the following alternatives. All alternatives met revenue requirements (O&M & capital projects) & met recommended minimum reserve balance 2024 and on (all 3 used some reserve funds in 2022 & 2023).

| Alt. # Base | | Rate | Temporary Rate Increases | | Default Long-term | 2024 Water | 2038 Water | |
|-------------|------|-----------|--------------------------|---------------|----------------------|------------------|----------------|----------------|
| Ait. # | Fee | Structure | Increase % | Start Year | End Year | Rate Increase | Loan Amount | Loan Amount |
| Alt. 1 | \$81 | 2 Tiers | 5.0% | 2024 | 2028 | 3.0% | \$6M | \$5M |
| Alt. 2 | \$60 | 2 Tiers | 5.0% | 2024 | 2027 | 3.0% | \$6M | \$5M |
| Alt. 3 | \$60 | 3 Tiers | 0.0% | | | 3.0% | \$6M | \$5M |

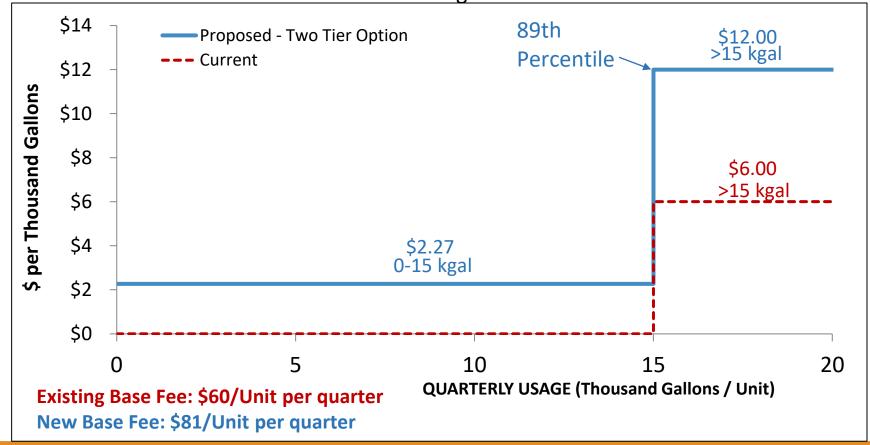

Key Takeaway: Alternative 1 was chosen as the District recommendation:

- It creates a stable revenue source for the District since a significant portion of the revenue comes from the base fee.
- It minimizes impact to customers (especially high use customers).

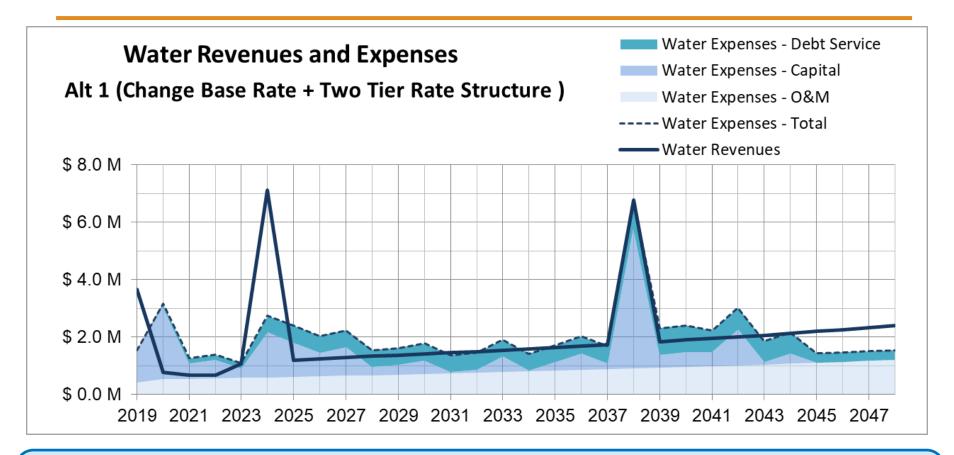

Water Rate Structure – Alternative 1 (Recommended)

- Increase base fee from \$60/Unit/Qtr → \$81/Unit/Qtr
- Keep two-tiered rate structure
 - Tier-break based on ~90th percentile of per-unit water usage, 2019 & 2020
- 5% rate increase from 2024-2028. Then a long-term rate increase of 3% after 2028

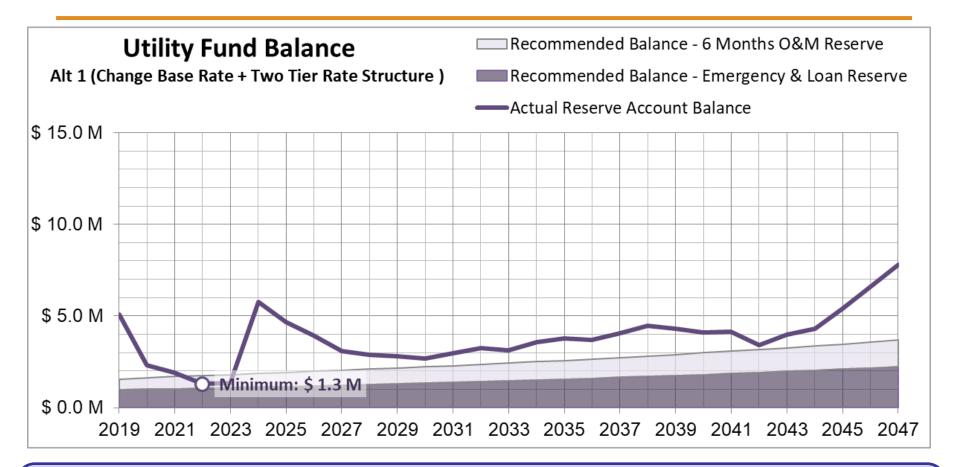

Alternative 1: District Recommendation

Key Takeaway: Alt 1 increases the base fee to \$81 and uses a two-tier rate structure. These rate increases are sufficient to cover operations & maintenance expenses and planned capital projects.

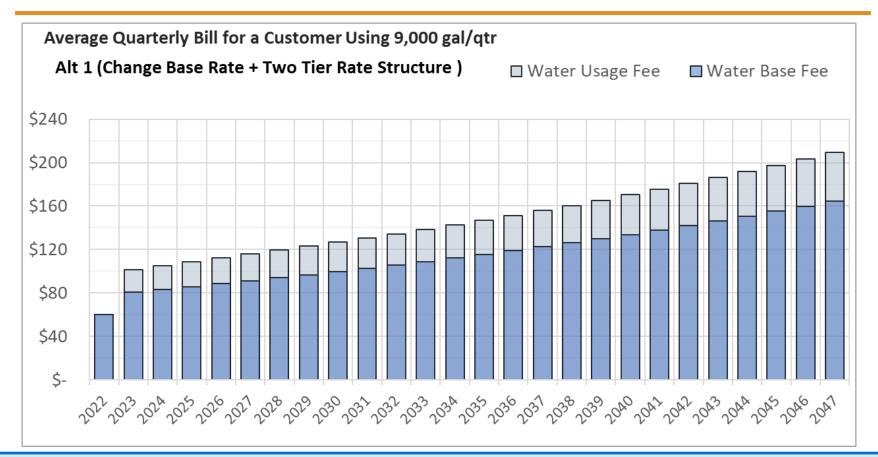

Alternative 1: District Recommendation

Key Takeaway: The rate increases and SRF loans will be sufficient to maintain the recommended reserve account balance in 2024 and on (with some use of reserve funds in 2022 & 2023).

Alternative 1: District Recommendation

Key Takeaway: Alt 1 increases the base fee to \$81 and uses a two-tier rate structure. A significant potion of the average quarterly bill is from the base fee. This will create a stable revenue source for the District and reduce impact to customers, especially high use customers.

Highest Water Users

| Account # | Current Unit # | Property Description | Average Yearly Usage | Average Quarterly Usage per Account | Average Quarterly Usage (per Unit) |
|-----------|-------------------|---------------------------|-------------------------|--|--|
| 779900 | 1 | Buffalo Ridge Clubhouse | 1,213,656 | 303,414 | 303,414 |
| 789100 | 1 | Timber Ridge Clubhouse | 522,766 | 130,692 | 130,692 |
| 748200 | 2 | Treehouse Club#2 | 650,688 | 162,672 | 81,336 |
| 320111 | 1 | WILDERNEST SUB | 187,383 | 46,846 | 46,846 |
| 243713 | 1 | EAGLESNEST TOWNHOMES | 151,437 | 37,859 | 37,859 |
| 242020 | 1 | VILLAGE AT WILDERNEST SUB | 137,121 | 34,280 | 34,280 |
| 560253 | 1 | SADDLE RIDGE TOWNHOMES | 135,430 | 33,858 | 33,858 |
| 140601 | 1 | ROLLING RIDGE TOWNHOMES | 128,308 | 32,077 | 32,077 |
| 140404 | 1 | ROLLING RIDGE TOWNHOMES | 122,912 | 30,728 | 30,728 |
| 749491 | 1 | Snowscape Clubhouse | 119,810 | 29,952 | 29,952 |
| 310232 | 1 | WILDERNEST SUB | 116,590 | 29,147 | 29,147 |
| 748000 | 4.6 | Treehouse Club#1 | 535,893 | 133,973 | 29,125 |

Key Takeaway: Top water users were determined by ranking each account by average quarterly usage (per unit) from 2019 and 2020 and then dividing that water usage by the number of units associated to the account.

Customer Cost Implications

| Account # | Current Unit # | Property Description | Average Quarterly Usage (per Unit) | Current Quarterly water Bill (per Unit) | Alternative 1: Quarterly water Bill (per Unit) |
|-----------|-------------------|---------------------------|---|--|--|
| 779900 | 1 | Buffalo Ridge Clubhouse | 303,414 | \$1,790.48 | \$3,576.02 |
| 789100 | 1 | Timber Ridge Clubhouse | 130,692 | \$754.15 | \$1,503.35 |
| 748200 | 2 | Treehouse Club#2 | 81,336 | \$458.02 | \$911.08 |
| 320111 | 1 | WILDERNEST SUB | 46,846 | \$248.90 | \$492.86 |
| 243713 | 1 | EAGLESNEST TOWNHOMES | 37,859 | \$229.04 | \$441.07 |
| 242020 | 1 | VILLAGE AT WILDERNEST SUB | 34,280 | \$178.64 | \$351.22 |
| 560253 | 1 | SADDLE RIDGE TOWNHOMES | 33,858 | \$184.57 | \$359.87 |
| 140601 | 1 | ROLLING RIDGE TOWNHOMES | 32,077 | \$189.98 | \$364.60 |
| 140404 | 1 | ROLLING RIDGE TOWNHOMES | 30,728 | \$160.15 | \$313.17 |
| 749491 | 1 | Snowscape Clubhouse | 29,952 | \$149.71 | \$294.48 |
| 310232 | 1 | WILDERNEST SUB | 29,147 | \$144.88 | \$284.82 |
| 748000 | 4.6 | Treehouse Club#1 | 29,125 | \$144.75 | \$284.55 |

- Notable increase in highest water users' rates
- By quickly increasing revenue through rate increases, future rate increases will be lower.

Key Points

- All customers are currently charged a flat quarterly base fee plus a usage fee for any water use beyond 15,000 gallons.
 - Water usage for the District is low compared to other water providers
 - Rate increases will likely not significantly decrease water use
- The District staff recommend the rate increases in Alternative 1.
 - Creates a stable revenue source for the District since a significant portion of the revenue comes from the base fee.
 - Minimizes impact to customers (especially high use customers).
- Increased revenue quickly by moving to a tiered rate structure where users are charged for all water usage.
 - Reinforces the message that water is a valuable resource and that none of it is free to treat and distribute
 - Increase base fee and introduce a two-tier rate structure
 - Increasing the base fee will create a stable revenue source that is not dependent on water usage
 - Large water users will experience a notable increase in their water rates
- Apply for SRF proposed loans to cover the costs of proposed CIP projects and maintain the reserve account balance.
 - "Bundled" water system projects for \$6M SRF Loan in 2024
 - \$5M loan in 2038 to cover the Tank 3 replacement
